

BAUER
FLY REELS

AS MUCH A BENCHMARK
AS IT IS A FLYREEL

2021

THE PERFORMANCE.

THE DESIGN.

THE MANUFACTURING.

THE ULTIMATE.

BAUER FLY REELS

are not defined by a single attribute, but rather, by the remarkable combination of unequalled performance, striking aesthetics and precision manufacturing.

Together, these qualities yield a noteworthy expression of form and function. Bauer fly reels are created to redefine your perception of quality while surpassing your expectations in every angling situation.

A BENCHMARK. WHY?

A Bauer Fly Reel is a benchmark against which all others are judged. It is an amazing, precision-manufactured fly fishing tool made with aerospace tolerances and to our exacting standards. Dependability day in and day out is the hallmark of a perfectly made product. We assemble every fly reel by hand in Montana assuming that today you'll catch the fish of your lifetime. You'll be ready. Today, and every day after that.

RVR

Specialized trout reels representing the pinnacle of modern reel technology: 5-Axis machined and double anodized to provide superior performance. No other fly reels can come close. Featuring our fully sealed zero start up inertia carbon fiber disk drag system.
5 RVR Models: 2/3, 4/5, 6/7, EN, MS

RX

Beautiful freshwater and saltwater reels featuring the best of 3-Axis machining to provide superior performance. Powerful dial drag located on opposite side from handle. Featuring our fully sealed zero start up inertia carbon fiber disk drag system.
10 Models: RX Freshwater 3wt-7wt, RX Saltwater 6wt-13wt

RX SPEY

Beautiful solid back Spey reels designed to perfectly balance two-handed rods. Feature a traditional, solid black polished hardback frame and large diameter spool to assure quick line pickup and ample capacity. Accommodates your line of choice, from Skagit to Scandi and traditional long belly Spey lines.
3 Models: RX Spey: 6wt-10wt

THE BAUER DIFFERENCE. CATCH MORE FISH.

We work with the best specialty machine shops in the U.S. and around the world to ensure that every part is precision made to our exact specs before being assembled by hand here in Twin Bridges, Montana – the same place we make all Winston fly rods.

OUR "ZERO BACKLASH" CLUTCH

You don't know smooth like this. Experience the incredibly smooth Bauer drag.

A fly reel is a critical piece of fishing equipment that must work reliably and instill angler confidence. Our unique 'zero backlash' clutch engages seamlessly, allowing the line to strip off the reel with a silky- smooth feel. The clutch mechanism is built from non-corrosive materials, making it far more durable than systems commonly used in other reels. Zero startup inertia means the line smoothly rolls off the reel at the start of the first run just as it does on the last for a consistent dependable performance every time.

The result: catch more fish.

FULLY-SEALED CARBON FIBER DRAG SYSTEM

A truly remarkable drag system.

Carbon Fiber is the perfect choice for a fly reel drag. Unlike cork, its performance is not dependent on lubrication. And, unlike polymers, carbon isn't affected by temperature changes. Our drag system is fully sealed, requires no maintenance, and delivers smooth, consistent performance. From big browns to steelhead to GTs to Tarpon, when you've hooked into something that requires a drag, this is the drag that's required. **The result: catch more fish.**

AEROSPACE QUALITY, PRECISION MANUFACTURING

"Bauer reels are precision-machined to tolerances down to 1/1000th of an inch from aerospace quality bar stock aluminum and stainless steel for maximum strength and corrosion resistance. The spool and carbon fiber drag system rotate on sealed, precision stainless steel ball bearings. All reels feature our unique smooth, fully sealed, zero start up inertia carbon disk drag. Every Bauer reel comes with a lifetime warranty. The manufacturing is flawless. and come with a lifetime warranty. **The result: catch more fish.**

RESIN-IMPREGNATED WOOD HANDLES

Our beautiful, custom-turned handles won't shrink or swell and are 100% saltwater safe.

FISHES AS STELLAR AS IT LOOKS.

NEW RVR REELS SPECIALIZED TROUT FISHING REELS

Our new RVR reels are optimized specifically for trout fishing applications. Each reel is perfectly balanced using a specific arbor diameter, line capacity, torque, and weight for whatever trout fishing you do. Each RVR reel also features our incredible, fully-sealed, butter-smooth carbon fiber zero start up inertia drag system.

RVR 2/3

Small streams and spring creeks are the ideal waters for 2 and 3wt. fishing. You're not likely to ever need 70 yards of backing here, or a drag capable of stopping a steelhead. What you will need is a lightweight reel designed with the smaller capacity and perfect drag for those very special angling situations.

RVR 4/5

The line and backing capacity, drag and weight of this reel have been appropriately designed for the more sizeable trout, larger water, longer casts and more varied techniques associated with 4 and 5wt rods. Whether you're fishing a floating line or a light sink tip, whether fishing dries or wets, this is the ideal reel.

RVR 6/7

A larger reel for the heavier line weights used when targeting trophy fish with large, wind-resistant or heavy flies. The increased backing capacity is more than sufficient to handle even the longest running trout. Intended applications are streamer fishing with floating or sink-tip lines, stillwater angling with floating, intermediate and full-sinking lines, as well as handling the aggressively-tapered lines needed to turn over large dry flies, poppers, articulated streamers, and double nymph rigs.

EURO-NYMPH

"The super large arbor of this reel design addresses the unique capacity requirements of the level lines used in European-style nymphing. The spool size and capacity is optimized for the reduced volume of level lines, and a full frame prevents the line from slipping out between the frame and spool. The result is an ultra-light design for highly technical nymphing. High-stickers, your reel has arrived.

MICROSPEY

Specifically designed for Micro Spey angling, this reel handles 3, 4, and 5 weight spey lines. This model features a full frame to prevent thin running line from slipping out of the reel. The weight of this reel has been carefully considered to balance the longer, two-handed rods used for Trout Spey. Reel capacities accommodate the wide variety of Scandi and Skagit style lines available.

OPTIONS:

RVR Trout reels are midnight black with gold trim. RVR Euro-Nymph reels feature white, laser-marked accents.

RVR Microspey reels feature "blackout" design with white accent ring on back.

MODEL	DIAMETER	LINE WT	CAPACITY	MSRP REEL	SPOOL PRICE
RVR 2/3	3.15 in	2/3 wt	WF3+(50yd 20#)	\$695	\$315
RVR 4/5	3.54 in	4/5 wt	WF5+(75yd 20#)	\$725	\$325
RVR 6/7	3.94 in	6/7 wt	WF7+(100yd 20#)	\$755	\$350
RVR EN	3.74 in	2/3/4 wt	Level Line+(100yd 20#)	\$755	\$325
RVR MS	3.94 in	3/4/5 wt	Skagit 360 grain +(100yd 20#)	\$755	\$350

5-AXIS MACHINED

We have been in development on the RVR reels for more than two years. We started with a groundbreaking and beautifully modern design and quickly found out how challenging it is to machine a reel of this complexity. No one had never seen anything like it. The complexity and double anodized design of the RVR would prove too difficult to achieve on a conventional 3-Axis machine, so we sought out the newest 5-Axis machines available. The result speaks for itself.

RX REELS

PRECISION. PERFORMANCE. PERFECTION.

Featuring awesome performance, superb quality and a beautiful, contemporary aesthetic, RX trout, saltwater and Classic Spey reels represent the pinnacle of manufacturing and design, and redefine smooth and reliable.

RX 1,2,3,4

Smaller, lightweight reels that can handle lines 2wt through 8wt and are ideal for all freshwater applications, as well as light salt. Perfect for trout, smallmouth bass, bonefish and other species.

RX 5,6,7

These larger RX reels were designed to handle and subdue extremely powerful fish such as tarpon, peacock bass, dorado, permit and other hard fighters that will quickly prove whether a reel is up to the task. They feature stronger seals, a more powerful structure and a drag system that features multiple carbon discs and 5X the surface area for maximum stopping power and control.

COLOR OPTIONS:

RX Reels are available with a Black frame, Gold hub and three spool color choices: Black, Dark Green or Charcoal/Graphite.

MODEL	DIAMETER	WT	LINE WT	CAPACITY	MSRP REEL	SPOOL PRICE
RX1	3.00 in	3.5 oz	3/4/5 wt	WF5+(55yd.20#)	\$495	\$225

RX7	4.50 in	9.4 oz	11/12/13 wt	WF12+(450yd. 30#)	\$925	\$420

RX SPEY REELS

AN ESSENTIAL COMPONENT OF
SPEY FISHING SUCCESS.

Specifically designed to balance two-handed or heavier saltwater rods, these reels feature a more traditional, solid black polished hardback frame. The large diameter spool assures quick line pickup and ample capacity to accommodate your line of choice, from Skagit to traditional long belly Spey lines.

COLOR OPTIONS:

RX Spey reels are available with a Black frame, Gold hub and three spool color choices: Black, Dark Green or Charcoal/Graphite

MODEL	DIAMETER	WT	LINE WT	CAPACITY	MSRP REEL	SPOOL PRICE
RX5 SPEY	4 in	9.1 oz	6/7 wt	Spey 6/7(175yd. 30#) Skagit 400 grain+(150yd.30#)	\$785	\$340
